

Recombinant Growth Hormone (Pituitary Marker) Antibody

Rabbit Monoclonal Antibody [Clone GH/4886R]

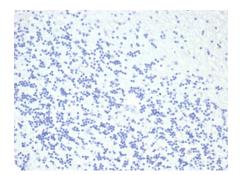

Format	Size
Purified Ab with BSA and Azide at 200ug/ml	20 ug
Purified Ab with BSA and Azide at 200ug/ml	100 ug
Purified Ab WITHOUT BSA and Azide at 1.0mg/ml	100 ug
	Purified Ab with BSA and Azide at 200ug/ml Purified Ab with BSA and Azide at 200ug/ml Purified Ab WITHOUT BSA and Azide at 1.0mg/ml

Immunohistochemistry (IHC) 1-2ug/ml	30 min at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes

Product Details			
Clone	GH/4886R		
Gene Name	GH1		
Immunogen	Recombinant full-length human GH1 protein		
Host	Rabbit		
Clonality	Monoclonal		
Isotype / Light Chain	IgG / Kappa		
Mol. Weight of Antigen	20kDa		
Cellular Localization	Secreted		
Species Reactivity	Human		
Positive Control	Pituitary cells. Human pituitary tissue (IHC).		

*Optimal dilution for a specific application should be determined.

Product Images for Recombinant Growth Hormone (Pituitary Marker) Antibody

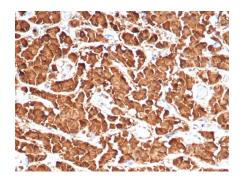

IHC analysis of formalin-fixed, paraffin-embedded human brain. Negative tissue control using rGH/4887 at 2ug/ml in PBS for 30min RT. HIER: Tris/EDTA, pH9.0, 45min. 2°C: HRP-polymer, 30min. DAB, 5min.

SDS-PAGE Analysis of Purified Growth Hormone Recombinant Rabbit Monoclonal Antibody (GH/4886R). Confirmation of Purity and Integrity of Antibody.

Formalin-fixed, paraffin-embedded human pituitary stained with Growth Hormone Recombinant Rabbit Monoclonal Antibody (GH/4886R).

Specificity & Comments

Pituitary growth hormone (GH) plays a crucial role in stimulating and controlling the growth, metabolism and differentiation of many mammalian cell types by modulating the synthesis of multiple mRNA species. These effects are mediated by the binding of GH to its membrane-bound receptor, GHR, and involve a phosphorylation cascade that results in the modulation of numerous signaling pathways. GH is synthesized by acidophilic or somatotropic cells of the anterior pituitary gland. Anti-GH is a useful marker in classification of pituitary tumors and the study of pituitary disease (acromegaly).

Supplied As

200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8 °C. Antibody without azide - store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Research Areas

Cardiovascular, Immunology, AKT Signaling, Cytokine Signaling

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.
