

Giardia lamblia Antibody

Mouse Monoclonal Antibody [Clone BB1.1E5]

Catalog No	Format	Size
MSM1-210-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
MSM1-210-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
MSM1-210-P1ABX	Purified Ab WITHOUT BSA at 1.0mg/ml	100 ug

Applications	Tested Dillution	Note
Immunofluorescence (IF)	1-3ug/ml	

Product Details

Clone	BB1.1E5
Gene Name	N/A
Immunogen	Giardia lamblia
Host	Mouse
Clonality	Monoclonal
Isotype / Light Chain	IgG1 / Kappa
Mol. Weight of Antigen	Not Known
Cellular Localization	N/A
Species Reactivity	Giardia Lamblia
Positive Control	Methicillin Resistant Staphylococcus Aureus extract or infected cells. Tissue.

*Optimal dilution for a specific application should be determined.

SDS-PAGE Analysis of Purified RANK Giardia lamblia Mouse Monoclonal Antibody (BB1.1E5). Confirmation of Purity and Integrity of Antibody.

Specificity & Comments

Giardiasis is a diarrheal illness caused by a single celled microscopic protozoan parasite, Giardia lamblia, also known as Giardia intestinalis. Giardia lamblia exists in two forms, an active form called a trophozoite, and an inactive form called a cyst. The active trophozoite attaches to the lining of the small intestine and is responsible for causing the signs and symptoms of giardiasis. The trophozoite cannot live long outside of the body and spread of infection is via the cyst, which is excreted in the host's feces. When it is ingested, stomach acid activates the cyst, and the cyst develops into the disease causing trophozoite in the new host. Giardiasis is diagnosed by finding cysts or trophozoites in the feces.

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.

Supplied As

200ug/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS provided.
