

# Pseudomonas aeruginosa serotype 5C Antibody

Mouse Monoclonal Antibody [Clone 320/65]

Catalog No	Format	Size
MSM1-239-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
MSM1-239-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
MSM1-239-P1BX	Purified Ab WITHOUT BSA at 1.0mg/ml	100 ug

Applications	Tested Dillution	Note
Immunofluorescence (IF)	1-3ug/ml	

Gene Name N/A Pseudomonas aeruginosa serotype 5C Host Mouse Clonality Monoclonal sotype / Light Chain Mol. Weight of Antigen N/A N/A Pseudomonas aeruginosa serotype 5C Mouse Mouse Monoclonal IgM / Kappa Not Known	Product Details		
mmunogen Pseudomonas aeruginosa serotype 5C Host Mouse Clonality Monoclonal sotype / Light Chain IgM / Kappa Mol. Weight of Antigen Not Known	Clone	320/65	
Host Mouse Clonality Monoclonal sotype / Light Chain IgM / Kappa Mol. Weight of Antigen Not Known	Gene Name	N/A	
Clonality Monoclonal sotype / Light Chain IgM / Kappa Mol. Weight of Antigen Not Known	Immunogen	Pseudomonas aeruginosa serotype 5C	
sotype / Light Chain     IgM / Kappa       Mol. Weight of Antigen     Not Known	Host	Mouse	
Mol. Weight of Antigen Not Known	Clonality	Monoclonal	
	Isotype / Light Chain	IgM / Kappa	
Collular Localization N/A	Mol. Weight of Antigen	Not Known	
Jenulai Localization 14/A	Cellular Localization	N/A	
Species Reactivity Pseudomonas Aeruginosa Serotype 5C	Species Reactivity	Pseudomonas Aeruginosa Serotype 5C	
Positive Control Pseudomonas aeruginosa serotype 5C extract or infected cells. Tissue.	Positive Control	Pseudomonas aeruginosa serotype 5C extract or infected cells. Tissue.	

<sup>\*</sup>Optimal dilution for a specific application should be determined.

#### Product Images for Pseudomonas aeruginosa serotype 5C Antibody

### **Specificity & Comments**

This antibody is specific for serotype 5C and does not react with other species. Pseudomonas aeruginosa is a Gram-negative, aerobic, rod-shaped bacterium with unipolar motility. It is an opportunistic pathogen of plants and humans and can infect the urinary tract, respiratory and gastrointestinal system, soft tissues, bones and joints leading to severe systemic infections of immunosuppressed patients in hospitals. P. aeruginosa secretes a variety of pigments, including pyocyanin (blue-green), fluorescein (pyoverdin), and pyorubin (red-brown). This organism can achieve anaerobic growth with nitrate as a terminal electron acceptor, and, in its absence, it is also able to ferment arginine by substrate-level phosphorylation. Adaptation to microaerobic or anaerobic environments is essential for certain lifestyles of P. aeruginosa, such as during lung infection in cystic fibrosis patients where thick layers of alginate surrounding bacterial mucoid cells can limit the diffusion of oxygen.

### **Supplied As**

200ug/ml of Ab Purified from Bioreactor Concentrate. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

### Storage and Stability

Antibody with azide - store at 2 to  $8^{\circ}$ C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

## **Limitations and Warranty**

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.
