

SOX12 (Transcription Factor) Antibody

Mouse Monoclonal Antibody [Clone PCR-P-SOX12-1E4]

Catalog No	Format	Size
6666-MSM2-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
6666-MSM2-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
6666-MSM2-P1ABX	Purified Ab WITHOUT BSA and Azide at 1.0mg/ml	100 ug

Applications	Tested Dillution	Note
Flow Cytometry (Flow)	1-2ug/million cells	

Product Details	
Clone	PCR-P-SOX12-1E4
Gene Name	SOX12
Immunogen	Recombinant fragment (around aa31-110) of human SOX12 protein
Host	Mouse
Clonality	Monoclonal
Isotype / Light Chain	IgG1
Mol. Weight of Antigen	34.12kDa
Cellular Localization	Nucleus.
Species Reactivity	Human
Positive Control	HeLa or U87 cells.

*Optimal dilution for a specific application should be determined.

Product Images for SOX12 (Transcription Factor) Antibody

Flow cytometric analysis of PFA-fixed HeLa cells. SOX12 Mouse Monoclonal Antibody (PCR-P-SOX12-1E4) followed by goat anti-mouse IgG-CF488 (blue), unstained cells (red).

Analysis of Protein Array containing more than 19,000 full-length human proteins using SOX12 Mouse Monoclonal Antibody (PCR-P-SOX12-1E4). Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProt™ array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProt™ are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to be specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.

SDS-PAGE Analysis of Purified SOX12 Mouse Monoclonal Antibody (PCRP-SOX12-1E4). Confirmation of Purity and Integrity of Antibody.

Specificity & Comments

Sox genes comprise a family of genes that are related to the mammalian sex determining gene SRY. These genes similarly contain sequences that encode for the HMG-box domain, which is responsible for the sequence-specific DNA-binding activity. Sox genes encode putative transcriptional regulators implicated in the decision of cell fates during development and the control of diverse developmental processes. The highly complex group of Sox genes cluster at a minimum of 40 different loci that rapidly diverged in various animal lineages. At present 30 Sox genes have been identified, and members of this family have been shown to be conserved during evolution and to play key roles during animal development. Some are involved in human diseases, including sex reversal.

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.

Supplied As

200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
